Construction Begins on Vehicle Maintenance Facility

Kansas City, Missouri. - This week, the KC Streetcar Constructors (KCSC) started construction on the Singleton Vehicle Maintenance Facility (VMF).

The VMF, named after architect and long-time transit advocate E. Crichton "Kite" Singleton, will be a two-story, full-service station for repairing, servicing and maintaining the streetcars for the KC Downtown Streetcar line. Located at 3rd Street and Holmes, this site is unique as it will allow ground access to both the upper and lower levels because of the slope of the terrain.

The VMF is a total of 24,982 square feet and includes 10,966 square feet of work area, 7,635 square feet of equipment and storage area, and 6,381 square feet of office area. Construction is scheduled for completion in summer 2015.

This is an active construction site and only authorized personnel are allowed on site.

Media personnel wanting access to the site should contact Meghan Jansen, Public Involvement Manager, at 816-214-0283.
